- **Prevent dehydration by drinking water frequently. Plan ahead, don't allow water to run out. Take water with you!**
- **Power lines! Treat all lines as energized. PG&E in the area.**
- **PPE- While engaged in Fire Line activities, Personnel will be in Full PPE.**
- **Communications- Ensure you have positive communications with your personnel. The incident is transitioning from a Type 3 to a Type I organization.**
- **Drive with your headlights on at all times, follow all speed limits and traffic laws.**
- **Be cautious of fire weakened or partially burnt hazard trees, Identify, Isolate and Make Notifications.**
- **Watch your footing on the fire line, maintain adequate crew spacing. There's very steep terrain on portions of the fire.**
- **Maintain Situational Awareness; don't be deceived by the fire's passive appearance.**
- **Remember when following LCES, post enough lookouts to have a good vantage of the entire hazard area. Review and practice your 10's and 18's.**
- **Brief your crews on all the components of the IAP.**

**Ensure firefighters have good anchor points, escape routes, and safety zones.
Remember LCES.**

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
